

PRESS RELEASE

Zeppelin Systems showcase at the European Coatings Show 2023

Friedrichshafen, March 2, 2023. The leading trade fair for the international paint and coatings industry, the European Coatings Show (ECS), will take place from March 28 to 30 in Nuremberg. Of course, plant engineering company Zeppelin Systems based in Friedrichshafen is on site as a system supplier with over 30 years of experience in the industry, presenting mixers, silos, components in pneumatic conveyor systems, and smart control concepts. An extra highlight: Modular solutions for repeatable production of different formulas. We create solutions!

How can paints, coatings, sealants and adhesives be produced efficiently? Zeppelin Systems will be providing answers to these questions as part of the European Coating Show 2023. The handling of powdered materials is very demanding; to facilitate fully automatic paint production, the experienced plant engineering company supplies tailor-made systems for storing mineral fillers, pigments and additives in silos, removing poorly flowing bulk materials, conveying them pneumatically and weighing them precisely. In addition, there are dosing systems for feeding dissolvers, either in batches or in continuous operation.

Visit Zeppelin Systems in Hall 4 at Stand 414

Zeppelin Systems creates tailor-made customer solutions for mixing powder coatings or processing pigments; the plant engineering company is a technology leader in the area of metal-effect coatings (bonding). The MB 10 master batch mixer shines bright directly on the stand. With this product, users benefit from very short cleaning times, high repeatability, excellent color fidelity and the highest precision weighing. Silos, key components in pneumatic conveyor systems, and smart control concepts round off the comprehensive portfolio of Zeppelin Systems as an integrated solution provider. "We are proud to create all solutions from a one-stop shop as a full-service provider for our customers from the paint industry," says Dr. Markus Vöge, CEO of Zeppelin Systems GmbH. "With our optimal process and machine design, our customers not only save time and money, but also achieve measurable production increases in paint production," adds Hubert Stojanovic, Vice President Performance Materials at Zeppelin Systems. See for yourself and check Zeppelin Systems in Hall 4 at Stand 414. We are looking forward to your visit!

We create solutions!

About Zeppelin Plant Engineering

Zeppelin Systems is a global leader in plant engineering for the handling of high-quality bulk materials. With over 70 years of experience in process engineering and extensive knowledge in handling countless raw materials, Zeppelin Systems offers complete and reliable solutions. With 22 locations worldwide, the company supports its customers from plant design through implementation and provides all aftersales services locally, from a single source. At Zeppelin Systems, innovative processes are just as important as the clever automation solutions and full range of service they provide to cover the entire life cycle of your plant. Each Zeppelin plant is customized to meet the requirements of each customer be it in the plastic, chemical, rubber and tire, or food industries. With the world's largest technology center network for bulk materials, Zeppelin enables its customers to carry out tests on an industrial scale and verify and optimize their plant design. Zeppelin Systems develops and manufactures its own components for key plant functions, which are also used in third-party plants. For more information, visit www.zeppelin-systems.com.

About the Zeppelin Group

The Zeppelin Group offers solutions in the construction industry, drive and energy systems, engineering and plant engineering. The Group provides customers with expertise in a number of areas, from the distribution and service of construction, mining, forestry and agricultural machinery, through rental and project solutions for the construction sector and industry as a whole, to drive and energy systems as well as engineering and plant engineering and enhances its offering with digital capabilities in all areas. Zeppelin is represented at more than 340 sites in 43 countries and regions worldwide. In the 2021 financial year, the Group workforce comprised almost 11,000 employees, which generated sales of EUR 3.7 billion. The Group organizes its activities into six strategic business units (Construction Equipment Central Europe, Construction Equipment Nordics, Construction Equipment Eurasia, Rental, Power Systems, and Plant Engineering) and the Zeppelin Digit Strategic Management Center. Zeppelin GmbH is the Group holding company. It is legally domiciled in Friedrichshafen and has its head office in Garching near Munich. The Zeppelin Group is a foundation-owned company. Its roots can be traced back to the establishment of the Zeppelin Foundation by Graf Ferdinand von Zeppelin in 1908. For more information, visit zeppelin.com.
